

AD FIRMS — Landing Page Fix List

businesssetup.ad-firms.com | For Developer | Google Ads India Campaign

This document contains all landing page fixes required before launching the Google Ads India campaign. Fixes are listed by priority. Please complete all  High priority items before go-live.

Priority Fix Summary

Priority	Fix	Impact	Who	Est. Time
1	Add India phone number	High	Client + Dev	15 mins
2	Change form to Industry dropdown	High	Developer	20 mins
3	Remove 'Your Enquiry' field	High	Developer	5 mins
4	Fix 0+ counter fallback	High	Developer	30 mins
5	Add INR price equivalent	Medium	Developer	5 mins
6	Move India trust signal above fold	Medium	Developer	10 mins
7	Make urgency line dynamic with date	Medium	Developer	15 mins
8	Add India flag near form header	Low	Developer	2 mins
9	Add Thank You page for conversion	High	Developer	30 mins
10	Remove Careers link from header	High	Developer	5 mins
11	Pin Indian testimonials first	Medium	Developer	15 mins
12	Add WhatsApp CTA below form	Medium	Developer	10 mins
13	Add EMI/instalment mention	Medium	Client + Dev	10 mins
14	Fix 0/7 support counter	High	Developer	10 mins
15	Add India-specific FAQs	Low	Developer	20 mins

Fix 1 — Add India Phone Number

Problem

The header, footer, and form all show +971 (UAE number). Indian visitors targeting India-specific Google Ads will hesitate to call a UAE number. This directly hurts lead volume.

What To Do

- Get an Indian virtual number via MyOperator, Exotel, or Knowlarity
- Display both numbers in the header side by side
- Update the phone field default prefix from +971 to +91

Header Code Change

```
// Before
+971 50 448 6285
// After
🇮🇳 +91 98XXX XXXXX | 🇦🇪 +971 50 448 6285
```

Form Field Change

```
// Before: placeholder="+971"
// After: placeholder="+91 (India) or +971 (UAE)"
```

Fix 2 — Change Form Dropdown to Industry

Problem

Current dropdown asks 'Select a package' — Indian visitors don't know which package they need. Asking their industry is more natural and reduces form abandonment.

Replace Dropdown Options With

Select your Industry...

- 🛒 E-commerce & Online Selling ← PUT THIS FIRST
- 📦 Trading / Import & Export
- 💻 IT & Technology
- 💼 Consulting & Professional Services
- 🏠 Real Estate
- 🍽️ Restaurant & Food Business
- ✈️ Travel & Tourism
- 🎓 Education & Training
- 📌 Other — I'll explain below

Why E-commerce First

E-commerce is the highest volume search segment from India for UAE freezone setup. It must appear first in the dropdown.

Fix 3 — Remove 'Your Enquiry' Text Field

Problem

The open text 'Your enquiry' field at the bottom of the form is a conversion killer for Indian mobile users. People on mobile will not type a paragraph before submitting.

What To Do

- Delete the <textarea> for 'Your enquiry' completely
- Final form should have exactly 3 fields only:
 1. Full Name
 2. Phone / WhatsApp (+91 prefix)
 3. Industry dropdown (from Fix 2)

4. [Submit Button] 'Get a Free Quote →'

Fix 4 — Fix 0+ Counter Fallback

Problem

The animated counters (Years Experience, Success Rate, Clients Served, Support) show '0' before JavaScript loads. On slow Indian mobile connections (2G/3G), visitors see zeros — this destroys trust immediately.

Fix — Hardcode Default Values

Set the actual numbers as the default HTML content so they show instantly even before the animation JS fires:

```
// Before (broken – shows 0 on slow connections):  
<span class="counter" data-target="500">0</span>+ Clients Served
```

```
// After (correct – shows real number immediately):  
<span class="counter" data-target="500">500</span>+ Clients Served
```

All Counters To Fix

- Years Experience → hardcode actual number (e.g. 8+)
- Success Rate → hardcode 98%
- Clients Served → hardcode 500+
- Support Available → hardcode 24/7 (currently shows 0/7)

Fix 5 — Add INR Price Equivalent

Problem

AED 4,888 means nothing instantly to an Indian visitor. They have to mentally convert. Add the INR equivalent to remove this friction.

Change Hero Price To

```
// Before:  
Dh 4,888
```

```
// After:  
AED 4,888 (~₹1.12 Lakhs)
```

Add the INR in smaller grey text directly below or beside the AED price.

Fix 6 — Move India Trust Signal Above the Fold

Problem

'Strong Indian Community' is currently buried deep in the Benefits section. Indian visitors need to see this immediately in the hero section.

Add This Line Below the Hero Headline

 Trusted by 500+ Indian Entrepreneurs in Dubai

Place this directly below '#1 Business Setup Company in Dubai, UAE' as a subtitle line in smaller text.

Fix 7 — Dynamic Urgency Line with Date

Problem

Current urgency text '🕒 Limited consultation slots available today' is static and feels generic. A dynamic date makes it feel real and time-sensitive.

JavaScript Code

```
// Add this script to the page:
const today = new Date().toLocaleDateString('en-IN', {
  day: 'numeric', month: 'long'
});
document.getElementById('urgency-text').innerHTML =
  `🕒 Only 3 consultation slots left today — ${today}`;
```

HTML Change

```
// Add id to the urgency element:
<p id="urgency-text">🕒 Limited consultation slots available today</p>
```

Output will dynamically show: 🕒 Only 3 consultation slots left today — 20 June

Fix 8 — Add India Flag Near Form Header

What To Do

Add a small India flag emoji to the form header to make Indian visitors feel the page is relevant to them.

```
// Before:
Get a Call Back Shortly!
```

```
// After:
🇮🇳 Calling from India? We're Here!
Get a Call Back Shortly!
```

Fix 9 — Create Thank You Page for Conversion Tracking

Problem

There is no /thank-you page after form submission. Without this, Google Ads conversion tracking cannot fire. Smart bidding (Target CPA / Maximize Conversions) cannot optimise. This is critical for campaign performance.

What To Do

- Create a new page at: businesssetup.ad-firms.com/thank-you
- After form submission, redirect user to this page
- Add Google Ads conversion tracking tag on this page
- Set this URL as the conversion action in Google Ads

Thank You Page Content

Headline: Thank You! We'll Call You Shortly.
Subtext: Our advisor will contact you within 30 minutes.
Check your WhatsApp for a message from us.
CTA: Chat on WhatsApp → (link to wa.me number)

Fix 10 — Remove Careers Link from Header

Problem

The 'Careers' link in the navigation header gives visitors a way to exit the page without converting. Google Ads landing pages should have zero navigation links.

What To Do

- Remove the Careers link from the landing page header entirely
- Keep only: Logo + Phone number in header
- Also remove footer links except Privacy Policy

Fix 11 — Pin Indian Testimonials First

Problem

The testimonials carousel shows random reviews. Indian names like Neha Panwar, Mukul Yadav, Midhun Baby, Baljit Kaur are in the list but not pinned first. Indian visitors convert better when they see Indian names.

What To Do

- Reorder testimonials array to show Indian names first
- Recommended order: Mukul Yadav → Neha Panwar → Midhun Baby → Baljit Kaur → others
- These reviewers mention specific service details — strongest social proof

Fix 12 — Add WhatsApp CTA Below Form

Problem

Many Indian leads prefer WhatsApp over forms. Currently the WhatsApp button is only a floating icon at the bottom right — not visible near the form.

Add This Below the Submit Button

Prefer WhatsApp? Chat directly with our advisor →
[WhatsApp Icon] +971 50 448 6285

Link it to: <https://wa.me/971504486285>

Fix 13 — Add EMI / Instalment Mention

Problem

AED 4,888 is a significant amount for Indian first-time entrepreneurs. Competitors are winning leads by offering instalment options. Even a mention of it increases form submissions.

Add Near Pricing

AED 4,888 (~₹1.12 Lakhs)
✓ Flexible payment options available – ask our advisor

Fix 14 — Fix 0/7 Support Counter

Problem

The 'Support Available' counter shows '0/7' instead of '24/7' before JS loads. This is a critical trust issue — looks like the business has no support.

Fix

```
// Before:  
<span class="counter">0</span>/7
```

```
// After:  
<span>24</span>/7
```

Note: This counter does not need animation. Just hardcode '24/7' as static text.

Fix 15 — Add India-Specific FAQs

Problem

Current FAQs are generic. Indian visitors have specific questions that competitors answer — if this page doesn't, they leave.

Add These FAQ Items

- Can I set up a UAE business while staying in India?
- Do I need to travel to Dubai for company registration?
- Can Indian nationals get UAE residency visa through business setup?
- Is UAE business setup possible for NRIs?
- Can I open a UAE bank account from India?

Suggested Answer — Example

Q: Do I need to travel to Dubai for company registration?

A: No. Most Free Zone setups can be completed 100% remotely from India. Our team handles all documentation, submission, and approvals on your behalf. You only need to visit Dubai if you are applying for a UAE residency visa.

Notes for Developer

- All fixes are frontend changes in Next.js — no backend work required.
- Estimated total time to complete all fixes: Under 3 hours.
- Please complete all  Red items before the Google Ads campaign goes live.
-  Yellow items should be completed within the first week of campaign launch.
-  Green items can be done at your convenience.
